- Anything version below does not support SmartForms.
- Latest version is MedTech Evolution v16.1

Shexie

- Anyone on Shexie v7.0 or higher has access to the SmartForms.
- Anything version below does not support SmartForms.
- Latest version is Shexie v7.0

MyHealthLink Portal

- Anyone using the MyHealthLink Portal has access to the SmartForms.

STEP 2:

Any site that is not on a PMS version that supports SmartForms need to follow the below steps.

- 1.** Contact their PMS vendor and let them know they need to update the version of their PMS for SmartForms. Their Vendor should assist them with this. (note most PMS upgrades will need to be done after hours).
- 2.** Once they have updated the PMS they will need to contact the HealthLink Helpdesk – ph: 1800 125 036 - to confirm that the any configurations required are done and forms can be access. In most cases HealthLink's Team will require access to the PMS Server or where HealthLink is currently installed to configure correctly. This step is quite straightforward, but access coordination with the Practice is important
