

Make a difference

Use your experience as a patient, carer or health consumer to improve your local health services.

Northern NSW Local Health District has a variety of ways consumers, carers and community members can be involved such as:

- Joining an advisory group
- Working in a project team
- Helping make patient information easier to understand
- Providing feedback about how we can continue to improve the things we do
- Teaching our staff about what it's like to be a patient here.

Find out how you can get involved:
